

Form

Function

Flexibility

(For Every Opening Problem)

MEGADOOR has changed the way to close many openings by helping change the form of the structure from its very beginning. The MEGADOOR is extremely tight and operates so dependably and consistently that there is seldom a worry of maintenance or unwanted downtime due to a non-functioning door or extreme weather conditions. Whatever the opening problem, the expertise of the MEGADOOR team comes together with the flexibility of the MEGADOOR to provide an Opening Solution.

Call to find out how MEGADOOR can provide a cost effective design on your next project!
